

WSQG Mystery - The Fourth Set of Clues  
Putting it all together

Very carefully measure your completed blocks. They should be 15 ½" by 15 ½"; if smaller than that you will need to trim the blocks to the largest common size and adjust your sashing strips accordingly.

Sew one 2" by 15 ½" strip of fabric (C) on two opposing sides of four blocks.

Sew one 2" by 15 ½" strip of fabric (C) on only one side of the remaining eight blocks.

Sew one of the single strip blocks to each side of the double strip blocks making sure (C) is on the outside edge. Make four rows of three blocks. Press all seams to (C). Set aside.

Sew a 2" square of fabric (D) on the end of remaining 2" by 15 ½" strips of fabric (C). Connect three long strips with the squares and finish each strip with a square. Sew one of these new strips between the rows of three blocks with sashing. Add one strip to top and bottom. Press all seams to (C).

Measure the length and width, at top, bottom and middle. Use the average to cut two strips 4½" of (A) to Length and two strips to the Width.

Sew the long 4 ½" strips of fabric (A) one each of the long sides of the pieced center. Press to A.

Sew a 4 ½" square of (D) to each end of the width long strip. Sew to top and bottom edge of the quilt.

Pat yourself on the back and do the happy quilter's dance.

Quilt as desired and bind with remaining 2 ½" strips of (D).
