"Star Shadows"

This is great project to learn about the Wing Clipper Tool by Studio 180 Designs. You will learn to make very accurate flying geese 4 at a time with this tool. After learning how to use this tool you will never want to go back to making flying geese the old way. You will make the illusion of stars floating above the ground and casting shadows below. Make a small quilt or a table runner with the wing clipper tool.

Class Length: Full Day

Skill level: All levels

Class Size: 20 Students

Project size: Throw 36" x 40" Runner 16" x 42"

Required Supplies:

Studio 180 Designs Wing Clipper Tool reg. \$30 - QW24 \$27

I have been quilting for about 17 years and started sewing by making my own clothes around age 12. Having sewn both garments and quilts and.....**Quilting is way more fun.**

I have been teaching for the past 7 years, & I love to find or design patterns that look complicated and find easier ways to make them, so even beginner quilters can make them. I want to help keep the art of quilting going by passing it down to the next generation.

Studio 180 makes great tools to help quilters become better at piecing with each new tool they use. The Deb Tucker tools have made me a more accurate and better quilter and I want to show the tools to every quilter.
