Quilt Wyoming 24 – Course Proposal

Color Selection Confidence

Description:

Color selection confidence for quilt projects is the goal of this lecture class. We will use work sheets and colored pencils to explore the Grumbacher and Wolfrom color wheels in the color selection process. There is a SMALL supply list that you will need to fully participate.

Resume Summary:

I was taught to quilt by my Grandmother at five years old, and she taught me to piece when I was eight, because I could then reach the peddle of my Mother's 1941 Featherweight. My B.S. in Family and Consumer Science created a love of sewing, which I have used to tickle my creativity and handle my stress management needs while working at the University of Wyoming for 27 years. I have taught many seminars over the years, and have recently begun teaching quilt related classes.
