These fun spinning stars are actually fairly simple to construct. You will use a layer cake to create these bright spinning stars on a black background, or various prints on a light background.

## Pre-class Cutting

- Sort your 10" bright or colored sqs into pairs that coordinate with each other. Example: a light blue print with a dark blue print....or however you like your pairs or stars to look.
- For the class you only need to cut about 6 pairs. Feel free to cut more if you wish.
- From these 12 - 10" sqs cut a 6" x 10" strip and save the remainder of the square for the borders.
- From background fabric - cut 3 - 6" x WOF strips.  
Cut 2 - 3 3/4" x WOF strips and subcut these into 3 3/4" x 3 3/4" sqs and cut these sqs **once** diagonally for triangles.  
Cut 2 - 5 1/4" x WOF strips and subcut these into 5 1/4" x 5 1/4" sqs and cut these sqs **twice** diagonally for triangles.

Dark Background with brights.
