

Brochure Bio Correction for Printed Brochure only :

I have been sewing since about age 12, making most of my garments through my school years. Shortly after making my first quilt I discovered Deb Tucker's Studio 180 Design tools. These tools make my quilting so much more accurate than other tools or rulers did. These are the only tools that I use now.

I have been teaching with Studio 180 Design tools for **9 years** now. Almost any pattern can be adapted to use these tools so you can become more accurate too. The tools make the usual block units that we all make over and over in our quilts, and many other units as well.

I love teaching quilters about these tools so they too can become even more accurate with their quilting.
